RE: Fireplaces/Flooding

To Whom It May Concern:

This letter is in reference to fireplaces made by Innovative Hearth Products in relation to water exposure. From a safety standpoint, it is our opinion that the fireplace be replaced if any part of the fireplace has been exposed to, or under, water. Further, we recommend that the replacement be done by a qualified service person or agency. If you have any questions in this matter, please feel free to contact us.

Thank you,

IHP TECHNICAL DEPARTMENT
